Out of this world, into your living space

NEW introduction!

These special leaf begonias are mysterious and a bit peculiar. They are based on the beauty and recognisable elements of the universe, which are similar to the characteristics of the plant. Just look at the leaves. They look different in different lightings. The diverse colour palette of the Spacestars is characterised by the universe and its stars: they shine, sparkle and twinkle.

The plant fits completely in today's trend: green plants
